Orientation
For Batch of 2022

Date: 2nd November 2022
Venue: Seminar hall

The Commerce Department of Sri Aurobindo college organized an orientation cum induction programme for the batch of 2023. The occasion marked the culmination of academics and Co-curricular activities of the department. Also Included the courses, VAC, SEC and things introduced in the new education policy. An opportunity for students and faculty Members to interact with each other and know each other for the upcoming 3 years journey.

•Orientation program is basically to welcome and orient freshers with the given department. It is inaugurated by the Principal Sir (Vipin kumar Aggarwal) and the teacher incharge of commerce department and department teachers deliver speeches along with a charming cultural program.

•It is basically a gathering of the freshers at a specific place in college where we are introduced with the course faculty and seniors. We also get the opportunity to interact with each other.

•They give us all the details about the college such as when it was established and about the success journey.

•They told us how our college has always been performing well in sports ,dance,cultural activities, NSS, NCC and other societies

• They told us about the New Education Policy(NEP) , in accordance with which we are going to study skill enhancement courses and value addition courses along with the major subjects.

•They introduced us with the system of 4 year graduation which had been introduced in NEP.

•They also told us about the difference between b.com and b.com honors .

•And, then at last they wish us all the best for our future endeavors.

Bon Voyage
Farewell for Batch of 23

Date: 1st May 2023
Venue: Seminar hall

The Commerce Department of Sri Aurobindo college organized a memorable farewell event to bid farewell to the bath of 2020-2023. The occasion marked the culmination of their academic journey and provided an opportunity for students and faculty members to reminisce about their experiences while expressing their well-wishes for the future. The event aimed to celebrate the experiences of the graduating students and bid them a fond farewell as they embark on the next phase of their lives.

The farewell celebration took place in the seminar hall which was beautifully decorated to create an ambiance of festivity and nostalgia. The arrangements included a stage for speeches and performances, as well as seating arrangements for faculty members, students, and distinguished guests.

The farewell event commenced with a warm welcome by the Principal (Prof. Vipin kumar Aggarwal) who addressed the students and expressed gratitude for their dedication and commitment to their studies, delivered inspiring speeches, reminiscing about the students' academic journey and acknowledging their accomplishments. They shared anecdotes, advice, and words of encouragement, emphasizing the value of their commerce education and the potential for success in their future endeavors.

Students were given the opportunity to share their experiences and express gratitude to the faculty and staff who had guided them throughout their college years. They spoke about the knowledge they gained, friendships they formed, and personal growth they experienced during their time in college.

To add entertainment and vibrancy to the farewell event, talented students from the Commerce Department showcased their artistic abilities through music, dance, and drama performances. These performances added a touch of creativity and showcased the diverse talents within the student community.

Conclusion:

The farewell celebration organized by the Commerce Department of Sri Aurobindo college provided an emotional and memorable evening for the outgoing college students. Through speeches, performances, awards, and personal reflections, the event highlighted the achievements and contributions of the students during their time in the Commerce Department. It served as a platform to express gratitude to faculty members and staff, while also inspiring and motivating the departing students to pursue successful careers in the field of commerce. The event concluded with a sense of unity and camaraderie among all participants, fostering a strong bond between the Commerce Department and its alumni.

AI REVOLUTION :- Transforming Jobs and Workforce
Webinar

Date: 6th July 203
Venue: Google Meet

Aakraya is the Commerce Departmental Association of Sri Aurobindo College. It has been actively operating for over 6 years and is undoubtedly one of the most reliable and productive societies of the college. The commerce society under the aegis of the department of commerce conducted an illuminating webinar on 5th July 2023 on AI REVOLUTION; TRANSFORMING JOBS AND WORKFORCE, the chief speaker was Jitender Anand president of Erishna E-mobility.

This provided students a great platform in understanding AI and its research field. All the participants were asked to produce their thoughts and doubts regarding AI and its increasing popularity in the modern era . JINENDER ANAND THE SPEAKER EXPLAINED Artificial intelligence (AI) is transforming the world of work. It's automating millions of jobs - but also creating millions more. Here's how AI can contribute to a positive future of jobs: by reskilling and upskilling, embedding learning into everyday activities, matching employees with opportunities and training youth. Artificial intelligence (AI), propelled by machine learning (ML), computer vision and the Internet of things (IOT), is fast evolving as a significant general purpose technology. It is no longer restricted to technology companies and is currently being pursued widely across all major sectors, such as manufacturing, agriculture, healthcare, retail, banking and financial services, and public utilities. AI is even being implemented in the fields of national defense and security. While an increasing number of industries have already embraced AI and started to reap its benefits, many others seem willing to explore the significant business opportunities and societal value offered by AI. Companies that are at a relatively lower maturity level along their digital roadmap need to identify the potential business cases for cautious AI application. The government's enthusiasm, support and initiatives undertaken for building AI-led solutions have provided a further push to their adoption. This traction has already motivated innovators and early adopters to develop solutions integrating human touch and machine capability. A vast majority of the tech giants and digital natives are currently in the space of augmented and assisted intelligence, wherein they are deploying AI to augment the human ability to perform tasks more efficiently with decision rights either held solely by humans or shared with machines. Chatbots, connected worker spaces, predictive asset maintenance, smart agriculture and many other such business cases serve as precedents for successful human—machine interaction models. Given the extensive applicability of AI, it has managed to create both excitement as well as perceived uncertainty regarding future employability and the role of humans and AI collaborative ecosystems.We lay emphasis on the current state of AI development in India across key sectors. We further examine the perception of industry professionals regarding the impact of AI on businesses and the risk of job

automation across these industries and functional roles. The report also assesses their Readiness and requirements in terms of skill sets, infrastructure, etc., to adapt to a post-AI environment. Overall the session was quite fascinating and helped students in tackling their doubts.
