

SRI AUROBINDO COLLEGE

13.09.2021

NOTICE

The Department of Commerce, Sri Aurobindo College is organising a 20-hour workshop on “**Data Visualization and Analysis for Beginners using spreadsheets**”, *from 21st Sep 2021*. Data literacy and the ability to analyse and transform data as per user needs are key competencies for several job roles across industries such as banking and finance, healthcare, media and entertainment, digital marketing, retail, telecommunication, automotive, cyber security.

You may have your data available in the form of unformatted text files, CSV files, database files, and so on. Using Excel, you can carry out data analysis from different perspectives and present the outcome of your analysis to the intended audience in a variety of ways like summary tables, box plots, pi-charts, histograms, and 2D curves. These capabilities enable us to transform the raw data into actionable information for various levels of management. High-paying jobs with strong growth prospects require data analysis as a key skill.

This course is meant for beginners of Excel, while advanced users will undoubtedly pick up new skills and tools. The workshop aims at developing capabilities to perform data analysis and transform figures into actionable information. This workshop will enhance your career prospects.
